

**Step 1-** Create local Repository “angularProject1” By using these command

```
>>mkdir angularProject1
```

```
>>cd angularProject1
```

**Step 2-** Initialize the git

```
>>git init
```

**Step 3-** Create file By using these command

```
>>nano app.html
```

```
>>nano main.ts
```

```
>>nano app.css
```

```
>>nano node.js
```

**Step 4-** Check git status and ignore the file

```
>>git status
```

```
>>nano .gitignore
```

```
>>git status
```

**Step 5-** Add the file and commit

```
>>git add .
```

```
>>git commit -m “project done”
```

**Step 6-** Change the branch from master to main

```
>>git branch -M main
```

**Step 7-** Connect the repository and push the code from local repository to github repository

```
>>git remote add origin https://github.com/Anurag7572/angularProject1.git
```

```
>>git push -u origin main
```
